

Sustainable Procurement Policy Statement

J.R. Pridham Services Limited (JRP) is a privately-owned company that specialises in the “Design, Manufacture, Installation, Commissioning and Servicing of Instrumentation, Control and Automation Systems”. This includes our market leading WaSP logger products, software, and associated data management services, designed to provide organisations with a versatile solution for control, visualisation, and management of road tanker reception / export facilities within the areas of liquid waste, sludge management and sludge cake export.

JRP are dedicated to leaving a positive legacy in our communities and environment. The choices we make have a significant impact on people, organisations and the wider environment.

We have developed a [Sustainable Procurement Policy](#) outlining how we and our supply chain will influence procurement choices of **goods, works** and **services** to; increase value for money, reduce consumption of primary resources, mitigate impacts on the environment and improve the lives of those in the communities in which we work.

By operating in line with this policy we will play our part in reducing risks, safeguarding natural resources, delivering value to our customers, improving resource efficiency, traceability, transparency as well as leaving a positive legacy on biodiversity and safeguarding natural capital.

Our approach to sustainable procurement is in line with the principles contained within BS 8903. This standard was created to add social value and adopt best procurement practice.

The JRP Sustainable Procurement Policy’s aims and objectives are to:

- Use fewer resources and minimise the carbon emissions associated with the goods, works and services we procure.
- Specify and procure materials and products that strike a responsible balance between social, economic, and environmental factors and generate benefits to society and the economy.
- Use resource-efficient products and give due consideration to end-of life uses.
- Promote, specify, and source materials which can be reused, and consider future deconstruction and recovery of resources to embrace the circular economy to leave a sustainable legacy.
- Where possible procure locally, providing opportunities for small and medium sized enterprises (SME’s), collaborate with the voluntary sector and increase the use of social enterprises.
- Ensure that fair contract prices and terms are applied and respected, and that ethical, human rights and labour standards are met, in line with our [Modern Slavery Policy](#).
- Source goods, works and services that embody our environmental policy, and health & safety policy and support the delivery of our [Sustainable Development Strategy](#).
- Enhance the health and wellbeing of the people and communities we work with by promoting materials and products that improve environmental quality.

Our [Sustainable Procurement Policy](#) is one of the ways in which JRP demonstrates its commitment to being a leader in sustainable development.

Jim Pridham
